Operational Efficiency

Arête

Arête ERP for streamlining businesses

Fragmented disparate systems, lack of visibility into business processes, poorly integrated systems – these are some of the most common challenges faced by enterprises trying to scale up operations. Many mid-sized businesses believe they can do without an ERP system. They believe that their operation is simple enough to control with a few spreadsheets. While this is a possibility, they are sub-optimum and short term measures that can cost you money and customer goodwill in the long term.

Arête ERP solution is a 360° platform that helps you connect and manage every aspect of your business operations with the decision support systems. It utilizes resources effectively, for more informed collaboration and decision making. Arête ERP tools integrate customer, business and technology with enterprises wide solution to ensure consistency in business processes. It improves productivity with management controls. Comprehensive Arête ERP

To provide true business value, an ERP solution has to be comprehensive and address the key functional areas of a business. Arête ERP is structured on 4 crucial pillars, Strategic, Technical, Operational and Financial.

The Strategic Pillar allows a 360° view of business function and gives you a better control of your business. The Technical Pillar defines Arête ERP as the ideal bridge between your business and technology strategies. It has the options of a managed, "on premise" solution or a SaaS solution "on the cloud" and can integrate easily with your stack of legacy software solutions. The Operational Pillar associates Arête ERP as one single suite of solutions for all your data from multiple business activities. The Financial Pillar includes managing inventory, cash flow and assets deployment in a better, faster and cost-effective manner.

A team of experts with an experience in serving global clients, rapid implementation and post-installation support and training, Arête ERP provides businesses the competitive edge they need.

Arête ERP Capabilities

Each ERP software module addresses a major functional area of a business. The key ingredient of this system is the use of a unified database to store data for various system modules. Once the ERP system is in place, it provides a wealth of insight and data to guide further process improvement, and the toolkit to deliver it.

Arête ERP capabilities include:

Comprehensive automation, a 360° view of your business

Improved productivity & management control tools

Cost-effective operations, distribution and storage management

Accounting/
Financial
Management
with QMS &
Audit Processes

Arête ERP Modules

Our Arête ERP modules enable businesses to periodically review their business processes, and adjust them to boost productivity and operational efficiency. They are both, economically and technically feasible. Our HRMS & Payroll Module helps you maintain a detailed and complete employee database to understand and assess employee's capabilities in order to develop and retain talent. The Sales & POS Module generates layered sales reports for different parameters for better analysis and improvement of sales cycle. It is ideal for e-commerce POS with an easy-to-use interface.

The Purchase and Inventory Management Module integrates with your supply chain management; it automates the vendor empanelment process and streamlines procurement of required raw materials, packaging material, sub assembly and other non-inventory materials. The Production Management Module is completely dedicated to managing the production process from process planning and scheduling to production order control. This comprehensive module ensures a seamless flow of information between departments.

Quality Management Module conducts raw material check. It plans and executes quality audits – for products, suppliers, processes, compliance, risk, etc. It adheres to regulatory compliance with NCRs (Non Compliance Report) and CAPA (Corrective Action and Preventive Action) reports. The Transport Management Module manages your fleet with a holistic simplified view of all your assets. It increases efficiency of fleet through logistics management – e.g. full load, half load, type of parcel, type of vehicle, trip sheets, distance travelled and more. And last but not the least, the CRM Module records and stores all customer related interactions. It creates sales projections based on sales generated reports department-wise, region-wise, location-wise. It facilitates entire sales cycle from offer to invoice and delivery.

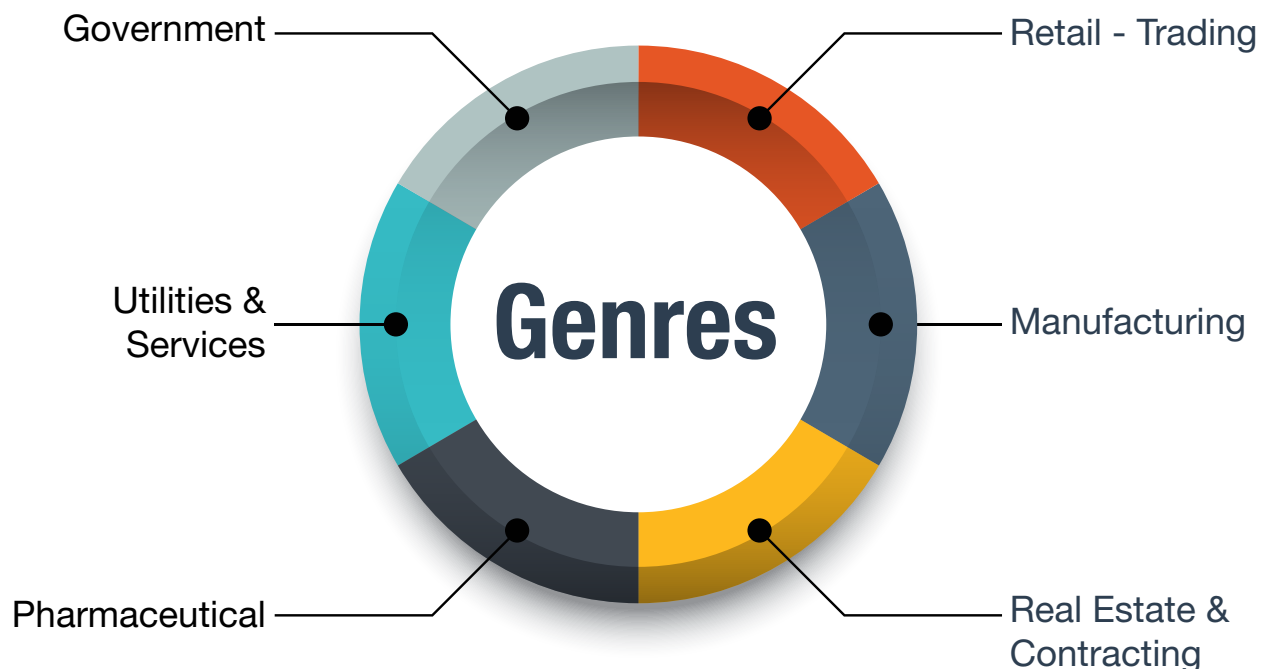

The Arête Advantage

Arête ERP solution enables businesses to have greater insight and visibility into their supply chain operations. Access to this key information allows them to make critical business decisions and to maintain a competitive edge in their industry, no matter how big or small the competition may be. It offers

- Uniform view of distributed information across functions and geographies in a standard format
- Improved inter-departmental communication and understanding of process flows
- Better informed decisions based on business insights gained
- Maximum opportunities to enhance revenues and profits
- Improved customer acquisition and retention through focused customer engagement
- Greater control over information access and analysis for increasing productivity
- Easier management of day-to-day operations
- Sharper alignment with corporate strategy and objectives through assessment of needs and resources
